Build America/Buy America Act Conformance Statement

Effective Date: May 2nd, 2023

Hardy Pro-Air Systems & Service (HPA) supports the Build America/Buy American Act when our customers use federal financial assistance to support certain federally funded water related infrastructure projects which are administered by the Environmental Protection Agency (EPA).

While we recognize that compliance is the responsibility of recipients of federal grants covered by Buy America statutes, HPA can provide Buy American compliant solutions to meet our customer's requirements.

The MD-Kinney positive displacement blowers which are a part of the Hardy Pro-Air package, pursuant to the requirements of the Buy American Act as depicted in catalog *MD-BC-FAM 1st Ed. 5/21* are certified to be end products that are manufactured in the United States and that MD-Kinney considers them to be COTS (commercial off-the-shelf) items entitled to treatment as domestic end products. In other words, these blowers are a manufactured product, manufactured in the United States.

The Gardner Denver positive displacement blowers which are a part of the Hardy Pro-Air package, pursuant to the requirements of the Buy American Act as depicted in catalog *MD-BC-FAM 1st Ed. 5/21* certify that Sutorbilt, DuroFlow, HeliFlow, and Cycloblower blowers are built using in-house machined components and then assembled, painted and supported in the United States.

The ABB electric induction single and three phase, open and enclosed motors, currently listed in the *501 Stock Motors* catalog under the Baldor / Reliance brand, are manufactured in the United States and are deemed commercially available off-the-shelf (COTS) items as defined under the Federal Acquisition (FAR) 2.101, as applicable under 41 U.S.C. chapter 83 Buy American also known as the "Buy American Act".

The balance of the components used on HPA solutions are sourced within the U.S.A. We ensure that the domestic component cost will exceed 60% of the cost of all components. Meaning, no federal waiver from the Buy American requirement is required in association with the use of Hardy Pro-Air solutions.

If further information is needed, please contact HPA at your earliest convenience.
Thank you for your interest.

Hardy Pro-Air Systems & Service, Inc.
